

Ensure Continuity of Care. Improve Compliance. Reduce Downtime.
Instant Mobile Access to Building & Compliance Information for Healthcare Facilities.

The ARC Facilities Solution for Healthcare: Protect Patient Care, Strengthen Compliance & Mitigate Operational Risk

Healthcare facility leaders are responsible for safeguarding our loved ones in healing environments. Their work involves patient outcomes, regulatory standing, and emergency preparedness. Unfortunately, many hospitals still use outdated paper processes which can delay care, increase liability, and jeopardize accreditation.

ARC Facilities modernizes hospital operations with instant mobile access to:

- As-builts, shut-off locations, and emergency plans.
- Equipment data and preventive maintenance records.
- Compliance documentation, including life safety and Joint Commission materials.

Tackle Key Challenges in Healthcare Facility Operations

- ✓ **Faster Emergency Response** – Locate shut-offs and emergency plans in seconds to reduce disruption and ensure safety.
- ✓ **Improve Survey Readiness** – Maintain an up-to-date digital repository of compliance documents and inspection reports.
- ✓ **Reduce Risk Exposure** – Protect against downtime, safety incidents, and documentation gaps that can impact patient care.
- ✓ **Enhance Operational Continuity** – Minimize delays caused by missing documents or retired staff taking knowledge with them.
- ✓ **Drive Efficiency** – Cut hours of search time with AI-powered access from any mobile device.

Instant Access to Building Information That Supports Patient Care, Revenue, and Uptime

Building Plans

- Digital as-builts with **hyperlinked callouts & index sheets**.
- Quickly **identify and locate shut-off** valves and electrical panels.
- Minimize downtime and **protect critical infrastructure**.

Emergency Information

- Instant mobile access to emergency plans and shut-off locations.
- **Faster decision-making** and coordination with first responders.
- Enhanced risk mitigation to **reduce financial liability and safety risks**.

O&M Documentation

- Digital floorplans with **field-verified asset location data**.
- Access equipment information in the field.
- Reduce costly maintenance delays with detailed equipment tracking.

Healthcare Compliance

- Centralized digital repository for compliance documentation.
- **Reduce penalties and liability exposure** with accurate, real-time records.
- Automate data-entry to avoid costly errors.

Legacy Documents

- Secure, **cloud-based** storage for CAD files, sketches, and historical data.
- **Enhanced OCR powered by AI** makes even old documents searchable.
- Simplified sharing ensures **continuity during personnel transitions**.

Construction Projects

- Real-time visibility into construction documents, RFIs, and discrepancy logs.
- Ensure a seamless closeout process with **digitized, organized records**.

AI-Driven Building Information Access That Supports Healthcare Resilience

- ✓ **AI-Powered Search** – Minimize downtime and response times with instant data retrieval.
- ✓ **View Multiple Pin Sets on a Single Floorplan** – View related critical assets on a single plan for faster decision-making.
- ✓ **Customizable Pin Icons** – Enable facility leaders to organize data based on department, function, or priority.
- ✓ **Customizable Dashboard & Shortcuts** – Prioritize access to the information you need with custom shortcuts and dashboards.
- ✓ **QR Codes for Pins, Equipment, and Forms** – Link directly to assets, forms or pins for instant access in the field.
- ✓ **Digitize Inspections and Checklists** – Fillable forms replace paper logs for maintenance, drills, and daily procedures.
- ✓ **Dynamic Campus Maps** – Get where you need to go quickly with real-time navigation links.
- ✓ **Biometric Login** – Strengthen data security and user access controls.
- ✓ **Feature Parity Across Platforms** – Maintain seamless access between mobile and desktop.
- ✓ **Share History** – Maintain access control with link expiration and management.

Strengthening ROI, Operational Readiness & Risk Management

Empower your organization with instant access to critical facilities information.
