

# ARC Facilities Building Plans + Construction Projects

## From Construction to Operations – All Your Building Data in One Place

Your buildings are constantly evolving.  
Now your facility data can keep up.

**ARC Facilities** brings **Building Plans** and **Construction Projects** together – giving your team **real-time access** to both **as-built conditions** and **active project documentation** in a single mobile platform.

### The Problem

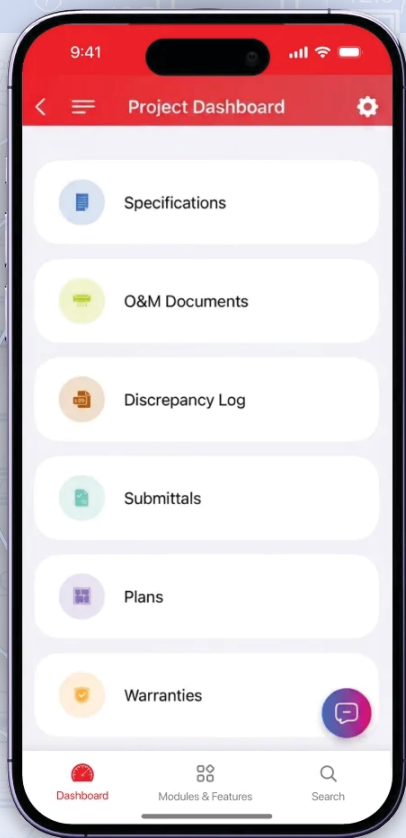

- Critical building data is buried in paper, PDFs, and disconnected systems
- Construction updates and closeout documents arrive late – or incomplete
- Facilities teams operate without the latest information when it matters most

## The Solution

### A Single System of Record for Your Entire Building Lifecycle

With **ARC Facilities**, you can access, manage, and update building information from construction through ongoing operations – anytime, anywhere.

- Instant access to as-builts, plans, and equipment data
- Real-time visibility into construction changes and documentation
- Seamless transition from project closeout to facility operations

## Core Capabilities

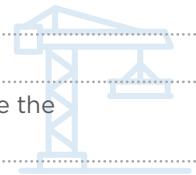

### Building Plans (Operations)

- Interactive campus and building maps
- As-built drawings in List and Map views
- Floor-by-floor shutoff mapping

### Construction Projects (During & Post-Construction)

- Visibility to current drawings, specs, RFIs, and other construction documents
- View the **latest set of construction documents at all times**
- See updates and changes across renovation projects
- Access to closeout information for operations teams before the closeout package arrives

## What's New: Fully Integrated Workflow

### Before:

Construction data lives in one place → Operations data lives somewhere else

### Now with ARC Facilities:

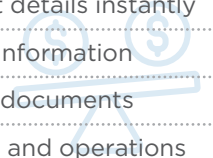

Construction Projects → Automatically feed → Building Plans

- Capture project updates in real time
- Automatically reflect changes in your as-built environment
- Eliminate gaps between project completion and operational readiness

## Business Impact

- **Faster Response Times** Locate shutoffs, plans, and project details instantly
- **Reduced Risk** Operate with accurate, up-to-date building information
- **Increased Productivity** Eliminate time spent searching for documents
- **Lifecycle Continuity** Bridge the gap between construction and operations

## The Bottom Line

**ARC Facilities** transforms disconnected building data into a **living, continuously updated system of record** – spanning construction through daily operations.
